

Software Developer with experience in Full-Stack Development, Web Automation, Internal Business Applications, and Process Automation. Currently leading more than 5 interns at Invicto Labs while owning internal application development and business-critical automation systems. Built Employee Productivity and Team Productivity solutions that replaced manual Excel-based workflows and improved operational efficiency. Developed and maintained automation pipelines across 150+ U.S. county tax websites using Node.js and Puppeteer.

SKILLS

Languages	JavaScript, Python, C++
Frameworks & Tools	React.js, Node.js, Express.js, PHP, Git, GitHub, Puppeteer, Postman, Figma
Databases & Concepts	MySQL, REST APIs, OOP, Data Structures, Algorithms, Web Scraping, Automation

TECHNICAL EXPERIENCE

Software Developer (On-Site)
Invicto Labs

Apr 2026 — Present
Bengaluru, India

- Lead and mentor 5+ interns through code reviews, sprint planning, and technical guidance.
- Built Employee Productivity and Team Productivity systems that replaced manual spreadsheet-based workflows.
- Own and maintain internal business applications used across multiple operational teams.
- Manage automation platforms extracting structured data from 150+ U.S. county tax websites.
- Implemented logging, monitoring, retry mechanisms, and production-grade error handling to improve system reliability.

Junior Web Developer
Invicto Labs

Aug 2025 — Mar 2026
Bengaluru, India

- Developed Node.js and Puppeteer automation pipelines across 150+ U.S. county tax websites.
- Built data extraction, DOM parsing, pagination, and normalization workflows.
- Improved scraper performance and reduced manual data collection efforts.
- Maintained production-grade automation systems and enhanced reliability through debugging and optimization.

Software Developer Intern (On-site)
KnowMyHealth & IshaDiagnostics

Jan 2025 — Jul 2025
India

- Led frontend development using PHP, JavaScript, HTML, and CSS.
- Developed responsive web interfaces and integrated third-party APIs.
- Improved application performance and user experience through UI optimizations.
- Collaborated with cross-functional teams to deliver healthcare-focused web solutions.

Summer Research Intern (Remote)
Florida International University (FIU)

2024
Miami, Florida, USA

- Conducted digital forensics research under Army Research Office funded initiatives.
- Performed evidence acquisition, validation, preservation, and forensic analysis.
- Assisted in research activities involving cyber investigations and digital evidence handling.
- Documented findings and contributed to technical research deliverables.

EDUCATION

Bachelor of Engineering (B.E.) in Information Science & Engineering , Sri Siddhartha Institute of Technology

2021-2025

ACTIVITIES

IEEE Student Branch Chairman

2023 – 2025

Led technical events, workshops, hackathons, and student initiatives while coordinating activities between students, faculty, and industry professionals.

Stock Market Analysis Algorithm Development

2024 – Present

Developed algorithmic stock screening and analysis systems using financial indicators, automation, data processing, and investment research methodologies.

County Tax Automation Platform Development

2025 – Present

Designed and scaled web automation solutions processing structured data across 150+ U.S. county tax websites using Node.js and Puppeteer.
